# Argonne Leadership Computing Facility

The Argonne Leadership Computing Facility provides world-class computing resources to the scientific community.

- Users pursue scientific challenges
- In-house experts to help maximize results
- Resources fully dedicated to open science

SIMULATION

DATA

LEARNING
ALCF offers different pipelines based on your computational readiness. Apply to the allocation program that fits your needs.
Architecture supports three types of computing

§ Large-scale Simulation (PDEs, traditional HPC)

§ Data Intensive Applications (scalable science pipelines)

§ Deep Learning and Emerging Science AI (training and inferencing)

Argonne
NATIONAL LABORATORY

ALCF Allocation Programs
INCITE: Innovative and Novel Computational Impact on Theory and Experiment
- Yearly call with computational readiness and peer reviews
- Open to all domains and user communities

ALCC: ASCR Leadership Computing Challenge
- Yearly call with peer reviews
- Focused on DOE priority
- Exascale Computing Project (ECP)

DD: Director's Discretionary Program
- Rapid allocations for project prep and immediate needs
- Early Science Program (ESP)
- ALCF Data Science Program (ADSP)
- Proprietary Projects

Argonne

Readiness	High		Medium to High		Low to High
Availability	Open to all scientific researchers and organizations *Capability > 20% of resource*				

Getting Started (DD)

Our Director's Discretionary (DD) allocation program provides researchers with small awards of computing time to "get started" on our computing resources while pursuing real scientific goals.

The DD allocation program allows users to prep their code so that it can take advantage of our massively parallel systems.

Argonne
NATIONAL LABORATORY
DD
Director's Discretionary

Purpose: A "first step" for projects working toward a major allocation

Eligibility: Available to all researchers in academia, industry, and other research institutions

Review Process: Projects must demonstrate a need for high-performance computing resources; reviewed by ALCF

Award Size: Low 10 thousand of node-hours

Award Duration: 3-6 months, renewable

Total percent of ALCF resources allocated: 20%

Award Cycle
Ongoing (available year-round)

Argonne
NATIONAL LABORATORY

ADSP
ALCF Data Science Program

Targeted at big data science problems, ADSP aims to explore and improve a variety of computational methods that will help enable data-driven discoveries across all scientific disciplines.

Eligibility: Available to researchers in academia, industry, and other research institutions

Review process: Applications undergo a review process to evaluate potential impact, data scale readiness, diversity of science domains and algorithms, and other criteria

Award size: ~Low hundred of thousand of node-hours

Award duration: 2 years

> Look for this to transition to an AI for science focus

Argonne
NATIONAL LABORATORY

ESP
Early Science Program

As part of the process of bringing a new supercomputer into production, the ALCF hosts the Early Science Program (ESP) to ensure its next-generation systems are ready to hit the ground running.

The intent of the ESP is to use the critical pre-production time period to prepare key applications for the architecture and scale of a new supercomputer, and to solidify libraries and infrastructure to pave the way for other production applications to run on the system.

In addition to fostering application readiness, the ESP allows researchers to pursue innovative computational science projects not possible on today's leadership-class supercomputers.

Award Cycle
Determined by production timeline

Argonne
NATIONAL LABORATORY

Major Awards (INCITE, ALCC)

Our major allocations provides users with computationally intensive, large-scale research projects time on our machines.

The programs conduct a two-part review of all proposals: a peer review by a panel of experts and a computational readiness review.
ALCC
ASCR Leadership Computing Challenge

The DOE's ALCC program allocates resources to projects directly related to the DOE's energy mission, as well as national emergencies, and for broadening the community of researchers capable of using leadership computing resources.

Eligibility: Available to researchers in academia, industry, and other research institutions

Review process: DOE peer reviews all proposals for scientific/technical merit; appropriateness of approach; and adequacy of personnel and proposed resources

Award size: ~1M node-hours

Award duration: 1 year

Total percent of ALCF resources allocated: 20%

Award Cycle
July 1 to June 30

Call open in fall
Plan for LOI

Argonne NATIONAL LABORATORY

INCITE
Innovative & Novel Computational Impact on Theory and Experiment

The DOE's INCITE program provides allocations to computationally intensive, large-scale research projects that aim to address "grand challenges" in science and engineering.

Eligibility: Available to researchers in academia, industry, and other research institutions

Review process: INCITE program conducts a two-part review of all proposals including a peer review by an international panel of experts, and a computational-readiness review

Award size: ~1.0-2.5M node-hours

Award duration: 1-3 years, renewable

**Total percent of ALCF resources allocated:** 60%

Award Cycle
January 1 to December 31

2023 Call Open New Proposals due June 17th

Estimations of Project Award Sizes and node-hours

Oak Ridge LCF

	200 PF	**>1.5 EF**
System Peak Performance	200 PF	>1.5 EF
Awards size

		Theta Intel-Cray XC40	**Polaris** HPE	**Aurora** Intel-HPE
		2023	**2023-2025**	**2023-2025**

INCITE U.S. DEPARTMENT OF ENERGY — LEADERSHIP COMPUTING

INCITE criteria

Access on a competitive, merit-reviewed basis*

1	Merit criterion
	Research campaign with the potential for significant domain and/or community impact

2	Computational leadership criterion
	Computationally demanding runs that cannot be done anywhere else: capability, architectural needs

3	Eligibility criterion
	• Grant allocations regardless of funding source* • Non-US-based researchers are welcome to apply

*DOE High-End Computing Revitalization Act of 2004: Public Law 108-423

Argonne
NATIONAL LABORATORY

Twofold review process

		New proposal assessment	Renewal assessment
1	Peer review: INCITE panels	• Scientific and/or technical merit • Appropriateness of proposal method, milestones given • Team qualifications • Reasonableness of requested resources	• Change in scope • Met milestones • On track to meet future milestones • Scientific and/or technical merit
2	Computational readiness review: LCF centers	• Technical readiness • Appropriateness for requested resources	• Met technical/ computational milestones • On track to meet future milestones
	Award Decisions	• INCITE Awards Committee comprised of LCF directors, INCITE program manager, LCF directors of science, sr. management	

Argonne
NATIONAL LABORATORY

2022 Award Statistics

	Summit	Theta	Polaris
Number of projects*	37	17	11
Average Project	508 K	1.24 M	102 K
Median Project	540 K	1.00 M	100 K
Total Awards (node-hrs in CY2022)	18.8 M	21.1 M	1.22 M

- Total of 53 INCITE projects (6 projects received time on both Theta and Summit)
  - 4 have time on both Theta and Summit
  - 11 have time on both Theta and Polaris
  - 1 project has time only on Polaris

* All reported in node-hours native to each resource.

Argonne
NATIONAL LABORATORY

Recent Trends in INCITE

Data, Learning and Nontraditional Uses of the Architecture

- In addition to traditional computationally intensive simulation campaigns, INCITE encourages Data and/or Learning projects with unique data requirements (e.g. large scale data analytics) or workflow needs that can only be enabled by the LCFs.
  - A "Learning" panel evaluated proposals that had significant machine / deep learning component to their campaign
  - When appropriate, these proposals were also assessed by their scientific discipline peers as well
- Early Career Track (w/in first 10 years of PhD)
- Interest in using AI or Quantum Testbeds
